CUTTING EDGE BRILLIANCE

Like a geode cradling glistening crystals within, CMP 520L's asymmetrical front panel design frames any fans that the user chooses to install as unique centerpieces on the build. Ample mesh provides generous intake for efficient cooling as well as dust filtration, extending the lifespan of installed components while allowing them to operate at maximum capacity.

The perforated power supply shroud accommodates both active and passively cooled PSUs, while keeping cables neatly tucked away for a tastefully sleek build.

CMP 520L boasts ample clearance and supports graphics cards up to 350mm in length and CPU coolers up to 161mm in height, so users can effortlessly upgrade components to match their gaming preferences.

FEATURES

Mesh Geode Front Panel – Inspired by clean-cut, asymmetrical crystal formations, the mesh front panel offers generous intake as well as efficient dust filtration.

Versatile Cooling Options – Support for up to six fans and front, top, and rear radiator support ensure that performance is not compromised.

Full Black Coating & PSU Cover – Let your system stand out with an all-black background and a PSU cover to hide cables.

Breathable Power Supply Shroud – The PSU cover is ventilated on top of the power supply location, this allows actively cooled units to be installed either with the fan facing the top or bottom, also with the possibility of installing passively cooled power supplies.

Room For Upgrades - Support for up to a 350mm graphics card, a 161mm CPU cooler, and multiple fans/radiators locations provides room for upgrades to stay ahead of the game.
