SHOWROOM READY.

RGB 16.7 Million Colors

FEATURES

3 Tempered Glass Panels – The front and side panel offer a clear view of the front fans and system configuration, while the panel behind the motherboard is patterned tempered glass to hide the open side of the PSU.

Addressable RGB Fans – Three pre-installed 120mm addressable RGB fans behind the front panel compliments components for a comprehensive lighting system

ARGB Lighting Control – Sync the ARGB fans by connecting the ARGB cable directly to the motherboard, or to the I/O panel, with the included 1 to 3 ARGB splitter. Certified compatible with: ASUS, Gigabyte, MSI, and ASRock motherboards for a comprehensive lighting system.

Support for a total of 7 fans & water cooling – Seven 120mm fans and front, top and rear water cooling support ensure that you don't have to compromise on performance

Cable Cover & Routing Space – A PSU shroud, cable cover, and 18~25mm width of space behind the motherboard provides options to keep systems clean; GFX cables can also be routed directly through the PSU shroud rubber grommet.

Graphics card support up to 410mm – Ample graphics card clearance provides a high potential for upgradeability

Aggressive Intakes – Large intakes on each side of the front panel feed air to cool the interior

The MasterBox MB530P utilizes the aggressive intakes seen on the MB510L, MB511, and MB520, but employs glass on both of the side panels and the front panel. The application of glass was put in place to support the display of addressable RGB fans included with the chassis.

Three ARGB fans, an ARGB control button, and a system that is compatible with other popular ARGB components mean each component will be presented through the front and side panels with clarity.

The choice in what to display and how clean it looks depends a lot on the covers available. For that, the PSU cover, cable covers, and clean routing space act as a system to manage which components should be displayed and which should stay hidden. There is also a honeycomb pattern on the side panel behind the motherboard; this textured pattern hides the PSU with an aesthetic accent.

SPECIFICATIONS & PACKING INFORMATION

Product Number		MCB-B530P-KHNN-S01
Product Name		MasterBox MB530P
Available Color		Black
Materials		Steel, Plastic, Tempered Glass
Dimensions (LxWxH)		489 x 229 x 469mm
Motherboard Support		ATX,Micro-ATX, Mini-ITX
Expansion Slots		7
Drive Bays	5.25"	N/A
	3.5"	2
	2.5"	4
I/O Port		USB 3.0 x 2, USB2.0 x2,Audio In / Out, ARGB control button
ARGB Controller		N/A
ARGB Cable		1 to 3 ARGB Splitter cable included
Pre-installed Fan(s)	Front	120mm ARGB fans x 3
	Rear	120mm Non-Led fan x 1
Fan Support	Front	120mm x 3 / 140mm x 2 (can only mount behind the front plate)
	Top	120mm x 3 / 140mm x 2
	Rear	120mm x 1
Radiator Support	Front	120/140/240/280/360mm
	Top	120/240/360mm (44mm max motherboard component height)
	Rear	120mm
Clearances	CPU Cooler	165mm / 6.49"
	PSU	180mm / 7.08"
	GFX	410mm / 16.10"
Cable Routing	Behind M/B Tray space	18~25mm
Dust Filters		Front, Top , Bottom
Power Supply Support		Bottom mount, ATX
EAN code		4719512074640
UPC code		884102047138
Net weight		8.55kg
Gross weight		9.94kg
Carton dimension (L x W x H)		560*290*540mm

Cont.	W/ Pallet	Carton/ Pallet	W/O Pallet
20'	224	28	316
40'	504	28	664
40 HQ	576	32	748

FEATURES

3 Tempered Glass Panels

The front and side panel offer a clear view of the front fans and system configuration, while the panel behind the motherboard is patterned tempered glass to hide the open side of the PSU.

Addressable RGB Fans

Three pre-installed 120mm addressable RGB fans behind the front panel compliments components for a comprehensive lighting system
Support for a total of 7 fans & water cooling

Seven 120mm fans and front, top and rear water cooling support ensure that you don't have to compromise on performance

Cable Cover & Routing Space

A PSU shroud, cable cover, and 18~25mm width of space behind the motherboard provide options to keep system configurations clean

Patterned Tempered Glass

The tempered glass panel behind the motherboard is patterned tempered glass to hide the open side of the PSU.

ARGB Lighting Control

Sync the addressable RGB lighting on the power button and fans by connecting the ARGB cable from the I/O panel to the included 1 to 3 ARGB splitter.
