## DIGISOL 24 Port Gigabit Ethernet Layer 2 Web managed Switch with 4 Gigabit SFP Ports

### DG-GS1528

#### Key Features:-

- 24 X 10/100/1000Base-Tx + Gigabit 4 SFP Ports
- STP / RSTP / MSTP
- Loop detection
- IGMP Snooping
- SNMP
- Quality of Service (QoS)

#### Introduction:-

DIGISOL DG-GS1528 is a Lite-Managed switching product. It is an intelligent network manageable switch designed for network environments that require high performance, high port density and easy for installation. It provides 24 Gigabit Ethernet and 4 SFP Giga. It supports VLAN, Port Mirroring and Port Trunking.

#### Performance and Scalability

It's a great entry level managed switch with 56 Gbps switching capacity. Wire-speed switching performance helps to take full advantage of existing high-performance on PCs and laptops by significantly improving the responsiveness of applications and file transfer times. The device also has Four Gigabit SFP ports for high speed uplinks to servers or backbones.

#### Continuous Availability

IEEE 802.1w Rapid Spanning Tree Protocol provides a loopfree network and redundant links to the core network with rapid convergence, to ensure faster recovery from failed links, enhancing overall network stability and reliability. IEEE802.3ad Link Aggregation Control Protocol (LACP) increases bandwidth by automatically aggregating several physical links together as a logical trunk and providing load balancing and fault tolerance for uplink connections.

#### Comprehensive QoS

Traffic is prioritized according to 802.1p giving optimal performance to real time applications such as voice and video.

#### Enhanced Security

Port Security ensures access to switch ports based on MAC address. Thus limiting the total number of devices from using a switch port and protects against MAC flooding attacks.

#### Simplified Management

User friendly web interface facilitates ease of management. It also supports to be managed and controlled by network station.
